

GARUN Series • Battery back-up for Garun UPS

Downtime costs for critical applications, in particular in industrial environments, are very high. These applications must remain in operation as long as possible, therefore both, the UPS and the battery cabinet, can accommodate batteries.

Compatibility	Garun 10KL only	Garun 15KL - 80KL	Garun 15KL - 80KL
Number of batteries supported	TA1222A From 20 to 40pcs of 7Ah to 9Ah	TA2422B / TA2422C From 32 to 80 pcs of 7Ah to 9Ah	TB2421E From 20 to 40 pcs of 34Ah to 48Ah

The UPS system was created to offer great flexibility for a better cost management. Offers availability for future system adaptation, in case of additional load is required up to 3 UPSes can be installed in parallel and in need of increased back up time multiple battery cabinets can be added.

Calculation of a battery system
 • Load (kVA)
 • Autonomy
